

Since the start of the Bundesliga in 1963, "sportmagazin" and from November 1968 "Kicker-sportmagazin" has chronicled the events faithfully in a multitude of ways. One of their most prominent features is the weekly rating of individual players' performances after each matchday.

What they use to evaluate is the German schoolsystem grade rating, where the best performance equals "1" and the worst equals "5".

On their website, Kicker recently published the average grades per season of all players since 1963. The following is a short overview of the results in four parts: Forwards, midfielders, defenders, goalies.
