

INTRODUCTION

"Fodboldens Hvem Hvad Hvor" and "Guinness Fodboldbog" already cover many aspects of Danish football. However, one area has so far been completely neglected, namely the ongoing in the Danish leagues. Therefore I decided well before the start of the 1984 season to compile a detailed statistical work about the Danish 1st division. All pieces of information have been taken from "Tips Bladet" that is the only Danish newspaper to bring complete line ups etc.

As I have followed the system used in most other similar works only a brief introduction is needed. The first part concentrates on the club as such, listing round, date of the match, home or away fixture, name of opponent, indication of the outcome of the match, ie. if it was won, drawn or lost. Next you find the final score, followed by the score at half-time. The scores are followed by the names of the scorers, the minutes of the goals scored. P indicates goal scored on penalty. OG stands for own goal. At the very right you find the attendance. At the bottom of the page I have aggregated most of the results above to form total figures.

The second part is dedicated to the players of the club. On top of the page you see if the player has a contract with the club (ie. is paid) or if he plays as amateur. If a club name is indicated it signifies that the player joined his present club from the one stated in or just before the 1984 season. The position played by each player is the given match by match. An "a" indicates the player was substituted for player No 12. In the same way "b" was taken out of the match and substituted by player No 13. A point (.) indicates one goal scored. To the very right you find the minutes in which the substitutions took place. At the bottom of the page I have again made aggregations of the (TOT) total number of matches played, (90m) how many times he played from the beginning to the end of the match, (UD/OUT) how often the player was substituted, (IND/IN) how many times the player came in as substitute and finally you see the number of goals scores by each player.

Certain errors in the figures are inevitable with this mass of information. If you discover such errors I hope you will notify me. Please also take the information concerning the status (pro/amateur) of the players with a certain reserve. Depending on the reception this is given I will consider publishing something similar in 1985.
